

## Developer ETL and Reporting – based in Berlin

### Come and join us!

We are an innovative IT company on a growth path. For our customers we integrate, check, clean, deduplicate and select their customer data. We need your support in this. You are motivated, like to get involved, think along with us and want to do your best for our customers? Then we look forward to hearing from you.

### What do we offer?

- An open, pleasant working atmosphere in the heart of Berlin with flat hierarchies
- A thorough familiarisation with your tasks
- Flexible, family-friendly working hours
- The opportunity to take on responsibility and develop yourself further in a permanent position
- Attractive employee benefits

### What are your tasks?

- You are responsible for the technical conception and implementation of our projects up to the transfer into regular operation
- You develop and implement new procedures and processes in data management and quality assurance
- You create data analyses, reports and automated tests
- You participate as a technical contact person in the planning, coordination and implementation of new requirements

### What do you bring?

- A university degree with a focus on computer science or comparable qualification
- Very good knowledge of the technical, professional and legal requirements when processing customer data
- Expertise in handling technologies and tools for mass data management
- Excellent SQL knowledge and expert knowledge of relational databases
- Reliable experience in the programming of ETL and reporting tools
- A high affinity to data and processes
- You can communicate securely in German and English
- Your way of working is structured and careful
- Independent and forward-looking action
- Enjoy challenging tasks and complex issues

### Interested?
