

IT Consultant Data Integration – based in Stuttgart

Come and join us!

We are an innovative IT company on a growth path. For our customers we integrate, check, clean, deduplicate and select their customer data. We need your support in this. You are motivated, like to get involved, think along with us and want to do your best for our customers? Then we look forward to hearing from you.

What do we offer?

- An open, pleasant working atmosphere in the heart of Stuttgart with excellent transport connections
- A thorough familiarisation with your tasks
- Flexible, family-friendly working hours
- The opportunity to take on responsibility and develop yourself further in a permanent position
- Attractive employee benefits

What are your tasks?

- You record data management requirements of our customers
- You will develop processes and procedures for data management with ETL and DQ tools as well as relational databases
- You will be involved in the quality assurance of the processes (random sampling, visual inspection, automatic testing)
- You organize and monitor the regular operation for the data management

What do you bring?

- You have an apprenticeship or a degree with a focus on computer science or business studies
- You have very good knowledge of the technical, professional and legal requirements for processing customer data
- You know ETL tools, are familiar with relational databases and have solid SQL knowledge
- You can communicate securely in German and English
- You have a careful, reliable and accurate way of working
- You are confident and courteous towards our customers

Interested?

We look forward to receiving your application to
